

Action plan submitted by Şule MÜRTEZAOĞLU for Bafra Anadolu İmam Hatip Lisesi - 29.01.2021 @ 21:22:15

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

## Infrastructure

### Technical security

- › You have differentiated levels of filtering in your school which is an excellent policy. A good policy still needs to be regularly updated - is the system being regularly updated? How often are sites requested to be blocked or unblocked? Periodically evaluate whether it is fit for purpose and involve all stakeholders in this process. In addition, bear in mind that an educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See [www.europa.eu/youth/EU\\_en](http://www.europa.eu/youth/EU_en) for examples of discussions that can take place in the classroom on this topic, through role-play and group games.
- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

### Pupil and staff access to technology

- › Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and sign the Acceptable Use Policy before they use the school's network.

### Data protection

- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.
- › Your new users are given a standard password and are asked to generate their own password on their first access. Passwords offer unique entry points into the school computing system and some basic rules of password security should be rigorously applied. For further information, read the fact sheet on Safe passwords at [www.esafetylabel.eu/group/community/safe-passwords](http://www.esafetylabel.eu/group/community/safe-passwords). Include these rules in your Acceptable User Agreement and avoid giving new users a standard "first access"

password.

## Software licensing

- It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.
- It is good practise that the member of staff responsible is fully aware of installed software and their license status.
- Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

## IT Management

- It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.
- There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.

# Policy

## Acceptable Use Policy (AUP)

- It is good practise that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.
- It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at [www.esafetylabel.eu/group/community/acceptable-use-policy-aup](http://www.esafetylabel.eu/group/community/acceptable-use-policy-aup).

## Reporting and Incident-Handling

- It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.

- › Please share the materials in which you tackle these issues especially with pupils and parents in the of the eSafety Label portal.

## Staff policy

- › As new technology and online practices emerge the borders of acceptable practice are constantly blurred. This is something that needs to be discussed at staff meetings often. Could you create a tutorial on professional online conduct of staff and upload it to your school profile via your [My school area](#) so that other schools can benefit from your good practice?
- › You have guidelines in your Acceptable Use Policy (AUP) on teachers' classroom usage of mobile phones. Upload your AUP to your school profile as it is a model of good practice that can help other eSafety Label schools.

## Pupil practice/behaviour

- › It is good that pupils have the possibility to shape school activities when discussing eSafety, be it extra-curricular and curricular ones, based on what is going on in their daily lives. This way they will be more engaged and it also allows the teacher to recognise real life issues.
- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.

## School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school ([www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school](http://www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school)) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.

# Practice

## Management of eSafety

- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development and regular review of your School Policy. See our fact sheet on School Policy [www.esafetylabel.eu/group/community/school-policy](http://www.esafetylabel.eu/group/community/school-policy).
- › It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at [www.esafetylabel.eu/group/teacher/incident-handling](http://www.esafetylabel.eu/group/teacher/incident-handling).

## eSafety in the curriculum

- It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).
- It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the [My school area](#).
- It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).

## Extra curricular activities

- Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).
- Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at [www.esafetylabel.eu/group/community/pupils-use-of-online-technology-outside-school](http://www.esafetylabel.eu/group/community/pupils-use-of-online-technology-outside-school).

## Sources of support Staff training

- In your school knowledge exchange between staff members is encouraged. This is beneficiary to the whole school. Upload PowerPoints, documents or similar of knowledge exchanges on eSafety topics via the uploading evidence tool, accessible also via the [My school area](#).
- It is good practise that you provide information to teachers on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. You might want to have a look at the [Essie Survey of ICT in schools](#).
- It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at [www.esafetylabel.eu/group/community/suggestions-for-online-training-courses](http://www.esafetylabel.eu/group/community/suggestions-for-online-training-courses).

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the**

Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
